WE want foreign capital to help us in our career toward prosperity, but, instead of burdening ourselves with loans, our wish is to obtain the capital required by exporting products and manufactures. We can put manufactured cotton goods in England and other ountries at a profit, but our high tariff is an obstruction to exportation. In a recent article the New York Bulletin showed that in 1860, under the Democratic tifteen per cent. tariff, the leading manufactures of the country were exported to the amount of \$29,134,-572, gold value. In 1876, under the present Republican forty-five per cent. tariff, the same articles were exported to the amount of \$26,750,000, gold value, showing a decrease of over \$2,380,000, or at a rate of eight per cent. Since 1860, our total exports, exclusive of gold and silver, have increased at the rate of seventy-four per cent., and our population at the rate of forty-four per cent.

The Messrs. Rogers, Harris & Williams, of Memphis, have invented and introduced into the house of representatives an electrical in-strument, by which the temperature of the house and committee-rooms may be deter-mined at a distance. For instance, a wire extending from the house of representatives to the APPEAL office, in Memphis, would in-dicate there every change of temperature in Washington. Its present use is to advise the chief engineer, in the lowest basement, whether he should drive up to the Hall hot or coll air, with his engines, and the

young alemphians, apropos to this, have named it the electrical thermotelemeter, from the Greek words elektron, thermos, tele, metron. It consists of a battery in the north dome, connected by wires with the engineer's room below, passing through a galvanometer there, back to the thermometers of the hall and through resistance-coils so inserted in population at the rate of forty-four per cent. Had our manufactured exports increased in accordance with these ratios, they would have amounted to nearly double their present value.

Which we will be happy to show to the people TO-MORROW (MONDAY).

To make our business a great success, and to build up an extensive establishment, we have started with the fixed purpose that we will positively sell goods as cheap as any house on the American Continent. We start with the metropolitan great and popular idea, that the smallest profits yield the largest sales. We start with the fixed purpose that, to build up a large trade, we must keep all classes of goods, for the rich and the poor—the cheap, the medium, and the fine quality. We have all these lines of goods, and

oughly hardened, and so adjusted that lost motion can be readily taken up.

EASE OF ACTION.—The simplicity of its ma-chinery, the few bearings and points of friction, and the absence of all cams and gear-wheels, give it a light, easy action that requires but little motive power.

It has an AUTOMATIC TENSION, which being self-regulating, does away with what in other machines is a fruitful source of annoyance and trouble.

There being no cogs to rattle, and no cams to rub and grind, it does its work without nelse.

Its action is so light and easy that it can be run by a fine cotton thread in place of the ordinary leather band.

the Fearful Explosion-All the Men in the Pits Perished. London, October 23.—The work of exploring the colliery at High Blantyre, in which the explosion occurred yesterday, proceeded throughout the night. Four miners were discovered alive about eleven o'clock, but in so exhausted a condition that one died before morning, and another is hopeless-ly prostrated. Mining experts say that all the men in the pits perished, but even if any are alive now, no rescue party can reach them n less than eight or ten days. The work of

CHICAGO, October 23.—Wood's museum caught fire this morning at six o'clock, and portion containing the theater was completely gutted. Chapin & Gore's liquor estab-lishment beneath was destroyed by water, and the museum animals all died from suffo-cation. John R. Walsh is proprietor and Tony Denier lessee of the museum and thea-ter, the loss on which is estimated at fifteen thousand to twenty thousand dollars. Chapin & Gore estimate their loss at twenty usand dollars. These are regarded as the property injured is two or three times the amount of the loss. The theater is the first carious existence ever since, G. W. Alexander, real estate dealer, has filed a voluntary petition in bankruptcy. The hundred and seventy-eight thousand dollars,
